

Setting the scene: The climate resilience challenge and how ESA is responding

Thursday 11 June 2020 / 16:00 CEST

The first webinar of this series will summarise the European Space Agency's current and planned activities in the climate domain, introduce the nature and scope of the ESA E04SD Climate Resilience Cluster, and provide an overview of the scientific and policy context to climate action.

Key learnings include:

- gaining an appreciation of how ESA is helping to improve our understanding of climate change and how its products and services can help you build resilience
- becoming familiar with the state of the science on climate change
- understanding key ways in which policy and financial systems underpin resilience action
- gaining appreciation of some of the main climate risks and opportunities
- familiarising yourself with the activities of the E04SD Climate Resilience Cluster

Speakers include:

- Dr Carlos Domenech, Project Manager at GMV
- Susanne Mecklenburg, Head of ESA Climate Office
- Bernice van Bronkhorst, WB Global Director on Climate Change
- Anna Burzykowska, ESA technical Officer
- Lydia Messling, Communications Consultant, Acclimatise
